

SOLIDUS CLASS B SHARE OFFERING

INVESTMENT TERMS, SUBSCRIPTION CONDITIONS & RISK DISCLOSURE

SOLIDUS HOLDINGS (PTY) LTD

Registration number: 2026/407807/07

CONSOLIDATED INVESTOR TERMS AND CONDITIONS

This document combines the Investment Memorandum, Class B Share Investor Terms and Investor Risk Disclosure into one coordinated information and offering document.

IMPORTANT STATUS This is an unsigned investor information and terms document. It is not a fill-in application form and contains no Signature Pack. A subscription becomes effective only through the separate approved investor-onboarding and subscription process, formal SOLIDUS acceptance, cleared funds and entry in the securities register.

INVESTMENT WARNING Class B shares are private-company equity and involve material risk. Capital, dividends, value growth, liquidity, buy-back, daily payouts, tokenisation and exit opportunities are not guaranteed. An investor may lose some or all invested capital.

DOCUMENT PRIORITY This document must be read with the current MOI, Class B rights, approved Board and shareholder resolutions, final subscription instrument and applicable law. If there is a conflict, the Companies Act, the registered MOI and the final binding instruments prevail, as applicable.

CONTENTS

- Part A - Investment opportunity and structure
- Part B - Class B offering and economic terms
- Part C - Subscription conditions and investor obligations
- Part D - Integrated risk disclosure
- Part E - Investor process and document control

PART A - INVESTMENT OPPORTUNITY & STRUCTURE

1. EXECUTIVE SUMMARY

SOLIDUS Holdings (Pty) Ltd is a South African private investment holding company established to develop, own, license and participate in scalable commercial ecosystems, intellectual property, operating businesses and community-development initiatives. Its flagship ecosystem comprises KaSiMaLL, KasiHub, KasiConnect and related payment, marketplace and enterprise-development capabilities.

The Class B programme is intended to fund approved growth and operating requirements across the SOLIDUS ecosystem without transferring management control away from the Class A voting structure.

2. VISION & INVESTMENT PROPOSITION

One Vision. One Connection. One Future. SOLIDUS seeks long-term enterprise-value growth through community-centred assets, recurring revenue, local participation, technology enablement and disciplined governance.

- Strong foundations and accountable governance
- Shared ownership and meaningful community participation
- Global perspective with local economic impact
- Sustainable and scalable growth
- Shared success for stakeholders

3. KASIMALL ECOSYSTEM & ROLLOUT

The ecosystem combines community retail centres, digital commerce, connectivity, payment enablement, CashBACK functionality, entrepreneur development, business incubation and community participation.

The current proof-of-concept focus is Gauteng and KwaZulu-Natal. Further expansion, including Limpopo or other provinces, remains subject to governance approval, funding readiness, site feasibility and implementation planning.

4. COMMUNITY PARTICIPATION

Provincial KaSiMaLL project entities are generally intended to reflect 75% SOLIDUS ownership and 25% community participation. The specific participation mechanism, eligibility criteria, rights and timing must be documented for each project.

5. CURRENT GROUP & PROJECT STRUCTURE

Entity / platform	Current structure	Role
SOLIDUS Holdings	Holding company; Class A control and Class B issuer	Group strategy, capital raising, investment holding and core IP ownership/licensing
KasiHub	75% SOLIDUS / 25% other strategic partners	Membership, engagement and ecosystem connectivity platform
KasiMall	75% SOLIDUS / 25% other strategic partners	Retail-centre development and delivery platform
Provincial KaSiMaLL entities	Generally 75% SOLIDUS / 25% community participation	Local project ownership, implementation and community participation
Kasi Roots Africa SPV	50% SOLIDUS / 50% Roots FSC Limited; intended 1,000 ordinary shares 50/50; no Class B shares	Joint venture governed under its final MOI, shareholder agreement and JEC

6. GOVERNANCE

EXCO leads executive strategy and implementation within delegated authority. The statutory Board retains all duties, powers and responsibilities assigned to directors by the Companies Act, MOI and approved governance instruments. Reserved matters and class/shareholder approvals remain subject to the MOI and applicable law.

- Schalk de Bruyn - SOLIDUS EXCO & Legal
- Hanli Lombard - Founder / Chief Operating Officer & Marketing
- Tertius du Plessis - Group Chief Financial Officer & Business Developer

7. INTELLECTUAL PROPERTY

Pre-existing SOLIDUS intellectual property - including KaSiMaLL, KasiHub, KasiConnect, KasiPay-related ecosystem rights, brands, business models and concepts - remains owned or controlled by SOLIDUS unless formally transferred. It may be licensed to operating entities or joint ventures. Pre-existing Roots intellectual property remains with Roots and may be licensed. New SPV intellectual property is governed by final SPV agreements.

Class B shares are shares in SOLIDUS only and do not give direct ownership of an individual project, platform, subsidiary or SPV, except indirectly through SOLIDUS's lawful interests and subject to the Class B rights in the MOI.

PART B - CLASS B OFFERING & ECONOMIC TERMS

8. SHARE & CONTROL STRUCTURE

The current approved capital structure provides for 100 Class A ordinary/voting shares and up to 1,200,000 Class B non-voting shares, subject to the registered MOI and valid issue approvals. EXCO participants collectively hold 51% of Class A voting control.

Class A shares carry voting and control rights under the MOI. Class B shares are non-voting except where law or the MOI grants mandatory class rights; may participate in dividends declared for Class B and limited residual liquidation distributions; do not carry management control; and may qualify for a separately approved tokenisation programme.

9. PHASED CLASS B OFFERING

SOLIDUS has approved a phased programme of up to 1,200,000 Class B shares, subject at every stage to the registered MOI, available authorised shares, valid corporate approvals and applicable law. Shares are issued only when a subscription has been accepted, the agreed consideration has been received, and the allotment has been entered in the securities register.

Phase	Total shares allocated	Cash-paid shares	BOGO shares	Price per cash-paid share	Indicative gross at full cash-paid allocation
1 - KasiShares Pioneer Pool	40,000	20,000	20,000	R450 or USDT 25	R9,000,000 or USDT 500,000
2	50,000	50,000	None	US\$50	2,500,000
3	50,000	50,000	None	US\$75	3,750,000
4	120,000	120,000	None	US\$100	12,000,000
5	120,000	120,000	None	US\$150	18,000,000
6	120,000	120,000	None	US\$200	24,000,000
7	150,000	150,000	None	US\$300	45,000,000
8	150,000	150,000	None	US\$400	60,000,000
9	200,000	200,000	None	US\$500	100,000,000
10	200,000	200,000	None	US\$600	120,000,000
TOTAL	1,200,000	1,180,000	20,000	-	385,750,000

The nominal US\$385.75 million programme total uses the stated later-phase USD prices and treats USDT 25 as the nominal Phase 1 dollar-equivalent price solely for aggregation. Phase 1 may be paid at either fixed price: R450 or USDT 25 per cash-paid share. Full Phase 1 cash proceeds would therefore be R9,000,000 if paid entirely in ZAR, USDT 500,000 if paid entirely in USDT, or a combination if investors use both options. Amounts exclude costs, taxes, exchange effects, network fees, commissions and deductions. No phase is guaranteed to open, complete or achieve its target.

OFFERING RESTRICTION SOLIDUS is a private company. This document is not authority for unrestricted public solicitation. Each invitation, placement, platform or fundraising channel may be used only after SOLIDUS has confirmed that the method, audience, disclosures and approvals comply with the Companies Act, the MOI and all other applicable regulatory requirements.

9A. PHASE 1 - KASISHARES PIONEER POOL

Phase 1 is a limited promotional allocation known as the KasiShares Pioneer Pool. It comprises exactly 40,000 Class B shares: 20,000 cash-paid shares and 20,000 matching BOGO promotional shares.

- For every one cash-paid Phase 1 Class B share subscribed for at either R450 or USDT 25, SOLIDUS will allot one matching Class B promotional share at no additional price, subject to acceptance and availability.
- Both Phase 1 payment prices are fixed alternatives: R450 per cash-paid share when paying in ZAR, or USDT 25 per cash-paid share when paying in USDT. Neither price will be converted or recalculated by reference to the prevailing ZAR/USD, ZAR/USDT or USD/USDT exchange rate.
- The consideration for each paired allotment of two Class B shares is either R450 or USDT 25 in total, depending on the approved payment option used. The matching promotional share carries the same Class B rights and restrictions as the cash-paid share.
- USDT payments are valid only when the exact required USDT amount is received in the official SOLIDUS wallet, on the network specified in the payment instruction, net of all network and transfer charges. A transfer to an incorrect wallet address, token contract or network does not constitute payment to SOLIDUS unless and until the funds are lawfully recovered and received.

- A person or entity may subscribe for no more than 300 cash-paid Phase 1 shares and may therefore receive no more than 300 matching BOGO shares, being 600 Class B shares in total.
- Multiple, duplicate or linked applications by the same legal person or entity will be aggregated for purposes of the 300 cash-paid-share limit. SOLIDUS may require beneficial-ownership and authority information to enforce the limit.
- Phase 1 closes when subscriptions for all 20,000 cash-paid shares have been accepted and the 20,000 corresponding BOGO shares have been allotted, producing 40,000 issued Phase 1 shares in total, or on an earlier lawful closure approved by SOLIDUS.
- Incomplete, non-compliant, unpaid or unaccepted applications do not reserve shares. Availability is determined when SOLIDUS formally accepts the application after cleared funds and compliance checks.
- The BOGO rule applies only to Phase 1. Phase 2 opens at US\$50 per Class B share and carries no BOGO or other automatic promotional allocation.

CORPORATE APPROVAL CONDITION The Pioneer Pool may be activated only after the Board has approved the complete paired-allotment terms, determined that the consideration for the issue is adequate, confirmed sufficient authorised Class B shares under the registered MOI, approved the subscription and register workflow, and aligned all relevant resolutions, investor materials, accounting treatment and certificate procedures.

10. OFFER MANAGEMENT

SOLIDUS may close, suspend or terminate Phase 1 before full allocation where lawfully required or permitted, but may not increase the 40,000-share Pioneer Pool, change the 1:1 ratio, alter either fixed Phase 1 price of R450 or USDT 25, or change the 300 cash-paid-share cap without the corporate approvals required by the Companies Act and MOI and without appropriate notice to affected applicants. Future phases may be amended only through the required approval and disclosure process. Accepted contractual commitments may not be changed retrospectively except as permitted by law and the binding subscription instrument.

11. USE OF FUNDS

Funds may be used for project development, infrastructure, technology, working capital, acquisitions, operating costs, expansion, debt reduction, intellectual-property development, renewable-energy initiatives and strategic investments approved through the governance framework.

Indicative use - Phases 1 to 3	Allocation
KaSiMaLL construction and fit-out	45%
KasiHub connectivity and ecosystem enablement	20%
KasiConnect	15%
Working capital	10%
Marketing	5%
Contingency	5%

Final use may be refined by approved budgets, funding conditions and governance decisions. Capital advanced by SOLIDUS to Kasi Roots Africa SPV is intended to be recorded as a SOLIDUS shareholder/project loan under final joint-venture agreements and may be delayed, subordinated, impaired or unrecoverable.

12. DIVIDEND & ECONOMIC PARTICIPATION

Class B shareholders may participate in dividends declared for their class and company-value growth as provided in the MOI and approved terms. Dividends are not guaranteed and depend on distributable profits, available reserves, cash requirements, the solvency and liquidity test and a valid Board declaration.

The current policy allows the Board to consider distributing up to 40% of annual distributable after-tax profits while retaining at least 60%. Within an approved dividend pool, the current policy allocation is 40% to Class A and 60% to Class B. This policy is not a guaranteed entitlement and may be amended through the required process, subject to vested rights and the MOI.

Any KasiHub-linked daily profit-share or payout mechanism is separate from a company dividend, governed by its own approved programme rules and qualifying membership requirements, and is not guaranteed by Class B ownership alone.

13. TOKENISATION & FUTURE LIQUIDITY

SOLIDUS may investigate a future tokenisation or liquidity platform. Any opportunity requires a separate approved offer, legal and regulatory compliance, technical readiness and investor acceptance. Class B holders have no automatic token or conversion right unless formally granted.

PART C - SUBSCRIPTION CONDITIONS & INVESTOR OBLIGATIONS

14. ELIGIBILITY, AVAILABILITY & ACCEPTANCE

Each proposed subscription is subject to legal and regulatory review, FICA and sanctions screening, source-of-funds verification, beneficial-ownership checks, internal approval and share availability. SOLIDUS may decline an application where lawfully permitted.

A subscription is effective only after the investor supplies complete information; passes compliance; signs the final subscription instrument; pays into a verified SOLIDUS account; SOLIDUS verifies cleared funds and formally accepts the application through an authorised representative; and the allotment is entered in the securities register.

For Phase 1, acceptance of each cash-paid share triggers the matching BOGO allotment, subject to the 300/600 cap and the remaining Pioneer Pool. An application, payment reference, payment receipt or acknowledgement does not by itself establish ownership or guarantee allocation.

15. INVESTOR REPRESENTATIONS

In the final process the investor must confirm that the investor:

- has received, read and understood the current offer documents, applicable phase terms and risks
- has had the opportunity for independent advice and due diligence
- invests for its own account or under disclosed lawful authority
- can bear the loss and is not relying on a guarantee
- has provided complete, accurate and non-misleading information
- is not prohibited and the funds are from lawful sources
- has disclosed duplicate, associated or representative applications relevant to the Phase 1 allocation cap

16. TRANSFERS & RIGHT OF FIRST REFUSAL

Class B shares may be sold, transferred, donated, bequeathed or otherwise disposed of only under the Companies Act, MOI and investor terms. Requirements may include notice, proof of authority, compliance verification, securities-register updates and approvals. Before a third-party transfer, the shareholder must give SOLIDUS the required particulars. SOLIDUS may elect, but is not obliged, to acquire the shares. Any later transfer remains subject to the MOI and compliance.

17. VALUATION & BUY-BACK

Where required, value may be determined by an independent auditor or valuation expert considering net assets, earnings, revenue, intellectual property, projected cash flows, strategic assets, market conditions, minority/liquidity factors and prospects. A valuation is not a guaranteed sale price. SOLIDUS may consider but is never obliged to repurchase shares; any repurchase is subject to funding, the solvency and liquidity test, the Companies Act, MOI and approvals.

18. LIQUIDATION, DEATH & SUCCESSION

Class B participates on liquidation only as provided in the MOI after creditors, employees, taxes, statutory and preferential claims and liquidation costs. No residual return is guaranteed. Transfers following death, incapacity, insolvency, matrimonial consequences or estate administration require lawful authority, documents, compliance and securities-register updates.

19. COMPLIANCE, REGULATION & DATA

The programme must comply with applicable requirements including the Companies Act 71 of 2008 and Companies Regulations, 2011, Income Tax Act, Tax Administration Act, Financial Intelligence Centre Act, Protection of Personal Information Act, Exchange Control Regulations, CIPC/SARS requirements and any applicable FSCA or other regulatory requirements.

Nothing creates a bank deposit, savings product, guaranteed investment, collective investment scheme, financial-product authorisation or public offer unless separately and lawfully approved.

Investor information may be collected, verified, retained and shared with authorised service providers, banks, regulators, auditors, legal advisers and compliance providers for lawful subscription, FICA, tax, governance, register and communication purposes, consistent with POPIA and privacy notices.

20. GOVERNING LAW & DISPUTES

South African law governs. The final subscription instrument must contain the approved notice, negotiation, mediation/arbitration and jurisdiction provisions. Nothing limits urgent relief from a competent court.

21. COMPANY RECORDS, ALLOTMENTS & CERTIFICATES

The official SOLIDUS securities register is the primary company record of registered ownership. Every valid issue or transfer must be recorded with the holder's required particulars, the number and class of securities, the date of issue or transfer, and - for certificated securities - the applicable distinguishing number or numbers and certificate details required by law.

For Phase 1, the register and allocation schedule must separately identify the number of cash-paid shares and matching BOGO shares while recording the investor's total Class B holding. The subscription and accounting records must show whether the fixed R450 or USDT 25 option was used, the number of cash-paid shares, the total consideration actually received, the receipt date and the relevant bank or blockchain transaction reference. Promotional shares may not be represented as cash-paid shares.

Any certificate must correspond with the securities register. When more shares are acquired and a consolidated replacement certificate is issued, every superseded certificate must be cancelled and recorded as cancelled. Certificate or distinguishing numbers may not be reused, improvised after issue, or allowed to conflict with the register.

22. INFORMATION SOLIDUS WILL REQUIRE

INFORMATION CHECKLIST ONLY Investors do not complete this document. SOLIDUS will request the relevant information through its approved application and FICA process.

Individuals

- Full legal names; identity/passport details; nationality; date of birth; tax residency/number
- Residential/postal address, email, mobile, occupation and employer/nature of business where required

Entities

- Legal name, registration/trust number, jurisdiction, registered address, business and tax details
- Directors/trustees/partners, authorised representatives, beneficial owners and controllers
- Authorising Board/trustee/member resolution and signing authority

Subscription and compliance

- Shares requested, phase, cash-paid shares, BOGO shares (if applicable), total allocation, selected fixed price, amount, currency, payment date and remitting bank-account or wallet holder
- For USDT: approved network, official receiving wallet, sending wallet, token, transaction hash, network fees and confirmation status
- Certified identity/registration records, proof of address, bank or wallet-control confirmation and tax information
- Source-of-funds/source-of-wealth, beneficial-ownership, sanctions/PEP and exchange-control records
- Verification consents, privacy acknowledgement, lawful-source confirmation and authority

PART D - INTEGRATED RISK DISCLOSURE

23. CORE RISK WARNING

AN INVESTOR MAY LOSE SOME OR ALL INVESTED CAPITAL. Returns, dividends, value growth, liquidity, repurchase, payouts, tokenisation and exit are not guaranteed.

24. PRIVATE-COMPANY, LIQUIDITY & CAPITAL-LOSS RISK

- Shares are unlisted, not publicly traded and may be difficult or impossible to sell when desired.
- Transfers take time and require legal, MOI, compliance and register processes.
- No buyer, secondary market or company repurchase is guaranteed.
- Internal or independent valuations rely on assumptions and may not be realisable.

25. DIVIDEND & DISTRIBUTION RISK

Dividends may never be declared; profits may be retained; cash needs and the solvency/liquidity test may prevent distributions. Past payments do not create a future entitlement. Separate profit-share mechanisms may change, cease or be unavailable.

26. BUSINESS, MANAGEMENT & KEY-PERSON RISK

Performance depends on strategy, management capability, controls, recruitment, governance, partner performance, customer acceptance and access to capital. Key-person loss, disputes, weak execution or incorrect assumptions may harm results.

27. PROJECT, CONSTRUCTION & ROLLOUT RISK

Projects may face failed site acquisitions, permitting delays, contractor default, defects, cost overruns, funding shortfalls, technology-integration problems, lower adoption or changed priorities. Proof-of-concept results may not scale.

28. FUNDING & USE-OF-FUNDS RISK

The programme may not raise targets or complete phases. Allocations may change under approved budgets. Phase 1 issues 40,000 shares while raising cash on only 20,000 subscriptions; this increases the number of participating Class B shares without corresponding cash proceeds for the BOGO shares. Advances to subsidiaries or SPVs may be delayed, subordinated, impaired or unrecoverable.

29. ECONOMIC, MARKET, FOREIGN-EXCHANGE & USDT RISK

Inflation, interest rates, unemployment, consumer spending, property/construction costs, economic or political shocks and currency movements may reduce demand, increase costs, constrain capital and change investment value. The Phase 1 prices of R450 and USDT 25 are separate fixed payment alternatives and are not adjusted against each other. USDT may deviate from one US dollar, face issuer, reserve, liquidity, regulatory, wallet, custody, network, cyber or transaction-finality risks. Later USD-denominated phases may have different ZAR or USDT settlement outcomes.

30. PARTNER, JOINT-VENTURE & COUNTERPARTY RISK

Technology providers, payment providers, contractors, landlords, financiers and partners may default, lose licences, change terms or withdraw. The 50/50 Kasi Roots Africa SPV may face funding mismatches, governance disputes, licence issues, reserved-matter delays or deadlock.

31. REGULATORY, LEGAL & POLITICAL RISK

Changes in company, securities, financial-sector, consumer, competition, tax, exchange-control, telecommunications, privacy, digital-asset, property or fundraising rules may restrict activity, increase costs, delay projects or require restructuring. Interpretation and enforcement may change.

32. TECHNOLOGY, CYBERSECURITY & DATA RISK

- Outages, connectivity failures and poor integration may interrupt services.
- Cyberattacks, fraud, unauthorised access or data loss may cause harm.
- Technology may become obsolete or fail to scale.
- Third-party payment/platform services may fail, change terms or lose authorisation.
- Digital-asset transfers may be irreversible. Incorrect wallet addresses, token contracts or blockchain networks may cause permanent loss and do not create an obligation on SOLIDUS to allocate shares where payment was not received.
- POPIA breaches may cause claims, penalties and remediation costs.

33. INTELLECTUAL-PROPERTY & BRAND RISK

SOLIDUS may be unable to register, protect, enforce or commercialise IP as expected. Infringement claims, licensing disputes, brand confusion, reputational events or unauthorised use may impair value.

34. TOKENISATION & DIGITAL-ASSET RISK

Tokenisation is exploratory and may never occur. It depends on separate approval, agreements, technology, custody, compliance and commercial viability. Regulatory approval may not be available. Class B ownership does not automatically grant tokens or value.

35. FORECAST & INFORMATION RISK

Forecasts, projections, phase values and budgets rely on assumptions that may prove incorrect. Actual outcomes may differ materially. Information may become outdated as projects, structures, laws and budgets change.

36. TAX RISK

Tax treatment depends on investor circumstances and may change. SOLIDUS guarantees no tax outcome or efficiency. Investors require independent South African and, if relevant, foreign tax advice.

37. GOVERNANCE & CONFLICT RISK

Differences between shareholders, directors, executives, related parties or joint-venture nominees may create conflicts, delays or litigation. Governance documents and controls reduce but cannot eliminate risk.

38. DEBT, SOLVENCY & LIQUIDATION RISK

SOLIDUS or projects may incur debt, grant security or face cash constraints. Creditors and preferential claims rank before shareholders on liquidation; Class B may receive little or nothing.

PART E - INVESTOR PROCESS & DOCUMENT CONTROL

39. INVESTOR REVIEW & REPRESENTATION CHECKLIST

Before subscribing, a prospective investor should understand and later confirm through the separate final subscription process:

- the possibility of losing some or all invested capital
- the non-voting and illiquid nature of Class B shares
- that dividends, payouts, buy-backs, exits and tokenisation are not guaranteed
- the current SOLIDUS group, project and joint-venture structure
- the applicable phase price, payment currency, digital-asset and exchange-rate exposure, and intended use of funds
- for Phase 1, that either R450 or USDT 25 purchases one cash-paid share and triggers one matching BOGO share, subject to the 300/600 cap and pool availability
- the need for independent advice, due diligence and complete truthful information

40. SUBSCRIPTION & ISSUE PROCESS

Step	Process
1	SOLIDUS supplies the current offering document and information request through an approved channel.
2	The investor supplies required information and supporting documents.
3	SOLIDUS completes FICA, sanctions, beneficial-ownership, eligibility, duplicate-application and internal approval checks.
4	If approved to proceed, the investor signs the separate final subscription instrument and pays into the verified SOLIDUS account.
5	SOLIDUS verifies cleared funds, remaining phase capacity and compliance, then formally accepts through an authorised representative.
6	For Phase 1, SOLIDUS records the cash-paid and matching BOGO components in the allocation schedule and securities register; for later phases, it records the accepted paid allotment.
7	SOLIDUS issues lawful evidence of title corresponding with the securities register and updates the remaining phase balance.

41. NO PERSONAL FINANCIAL ADVICE

SOLIDUS does not provide personal financial, investment, legal or tax advice through this document. Investors should obtain independent advice and conduct their own due diligence.

42. RELATED GOVERNANCE DOCUMENTS

Current registered MOI and Class B rights; Board/shareholder resolutions approving the programme and Pioneer Pool; final subscription instrument and separate investor application/FICA pack; Pioneer Pool allocation schedule; dividend and shareholder communication policies; dispute, death/estate transfer and securities-register procedures; share certificate template and cancellation register; privacy notice; and any future tokenisation framework.

43. PRE-LAUNCH CONTROL REQUIREMENTS

- Confirm the registered MOI authorises at least 1,200,000 Class B shares with rights matching this document.
- Adopt and retain the Board and any shareholder resolutions required for the phased programme and the Phase 1 paired allotment.
- Ensure that the Board determines adequate consideration for the Phase 1 paired allotment and records that determination.
- Approve the ZAR bank-account and USDT wallet/network payment instructions, authorised access controls, transaction-evidence requirements and accounting treatment before receiving funds.
- Approve one master allocation schedule linking application, payment, acceptance, cash-paid shares, BOGO shares, total shares, distinguishing numbers and certificate details.
- Configure the securities register and certificate process before accepting subscriptions.
- Confirm the lawful offer route and audience with South African corporate/financial-services counsel before circulation or promotion.
- Align investor communications, application form, payment portal, accounting records and marketing materials with this Version 1.2.

DOCUMENT CONTROL

Field	Details
Title	SOLIDUS Class B Share Offering - Investment Terms, Subscription Conditions & Risk Disclosure
Version	1.2 - ZAR and USDT Phase 1 Pricing Edition
Issue date	2 September 2026
Status	Controlled consolidated investor terms and conditions; unsigned information edition; not an application form
Supersedes	Version 1.1 issued 29 August 2026
Source documents	Version 1.1; approved Phase 1 KasiShares Pioneer Pool terms; approved fixed ZAR and USDT payment prices
Material changes	Schalk de Bruyn title updated to SOLIDUS EXCO & Legal; Phase 1 fixed prices clarified as R450 or USDT 25 per cash-paid share; USDT receipt, record, transaction and risk controls added

LEGAL REVIEW NOTE Before launch or use as a binding offer document, South African corporate and financial-services counsel must confirm alignment with the registered MOI, Class B rights, securities-issue resolutions, adequacy and accounting treatment of consideration, lawful fundraising mechanism and audience, final subscription workflow, FICA/POPIA requirements, exchange control and all applicable regulation.
